25X1

The following broadcasting stations are to suspend operations temporarily until the end of 1950, because of technical work to be performed:

- a. The two stations Leipzig I and II, both 100-kW transmitters, will be given a general overhaul. It is also planned to replace the old radio tower.
- b. The frequency range of the station ^{at} Bernburg, a 20-kW transmitter, will be enlarged.
- c. The station at Schwerin, a 20 kW transmitter will be transferred from a wooden structure to a brick building and simultaneously will be given a general overhaul. Its frequency range will also be enlarged, and its operations will be maintained by means of 2-kW transmitters.
